DESICCANTS

Moisture control: The desiccant absorbs moisture vapour through the capillary action of the absorbent particles. Neither the particles, nor the bag that contains the particles, is changed physically by the absorption action. As well, the container does not become saturated, therefore it doesn't soften or liquefy during use. And metal parts touching the bag will not corrode.

Dust-free: Tyvek bags are ideal for applications where dust must be kept to a minimum. Examples include computer components, packaged chemicals, and photographic and optical devices.

TEMPERATURE/HUMIDITY DATA LOGGERS

• Monitors both ambient temperature and relative humidity
• Stores up to 16000 temperature and 16000 humidity readings
• User selectable measurement rate from 2 seconds to 24 hours
• Alarm display if user-defined max-min values are exceeded
• Displays all status information through two LEDs
• Simply plug the logger into the USB port of your computer to begin downloading – no cables or wires are required
• Includes wall mount bracket and Windows compatible software
